

The ARRIFLEX D-20 combines the handling and functionality of motion picture cameras with the immediacy of digital acquisition to provide a modern film-style digital camera system.

The D-20 single Six-Megapixel CMOS sensor is the same size as the Super 35mm film aperture, allowing the creative use of 35mm format lenses resulting in images with the same depth of field. Camera handling is enhanced by an optical viewfinder and the D-20's inherent compatibility with many existing film accessories.

ARRIFLEX D20 TORONTO OPEN HOUSE with Denny Clairmont and Mike Condon, soc

Clairmont Camera will be introducing the D-20 to industry professionals on

Tuesday, March 27th, 2007 - 3:30 to 7:00pm
